## 10. Glossary

**Gross domestic product (GDP)**-is measured as aggregate of the added value, created in the branches of economics. The generalizing in economic indicator of the activities of producers-residents during the report period.

**GDP deflator** -the ratio of the gross domestic product at current prices to gross domestic product at constant prices multiplied by 100.It is the weighted average of the detailed price indices used to deflate the gross domestic product: the weights used reflect the importance of each category of output in the gross domestic product.

**The Consumer price index (CPI)** - is the main indicator of the inflation level. It characterizes the dynamics of the value of the goods and services obtained by the customer with a medium purchasing power. It reflects the changes of the total sum of the consumer expenses of the population on the unchanged able collection of the consumer goods and services within a definite period. The main purpose of CPI is to define the value dynamics of the consumer goods and services.

**The Balance of payments (BOP)** - the balance of payments is a statistical statement that summarizes transactions between residents and nonresidents during a period. It consists of the goods and services account, the primary income account, the secondary income account, the capital account, and the financial account.

**Capital account**- a BOP account that covers all capital transfers and acquisitions/disposals of non-produced, non-financial assets between residents and non-residents.

**Current account**- a BOP account that covers all transactions in goods and services, income and current transfers between residents and non-residents.

**Income account**- a BOP account that covers two types of transactions with non-residents, namely (!) those involving compensation of employees that is paid to non-resident workers (e.g., cross border, seasonal, and other short-term workers) and (ii) those involving investment income receipts and payments on external financial assets and liabilities, with the latter including receipts and payments on direct investment, portfolio investment and other investment, as well as receipts on reserve assets.

**Trade balance**- as a balance of a country's balance of payments showing the relationship between total exports and total imports. It is usually divided into a visible balance, referring to goods and an invisible balance, referring to services. The balance is in surplus if exports exceed imports; in deficit if imports are in excess of exports.

**Currency in circulation-** banknotes and coins in circulation, which commonly used to make payments. Currency in circulation as included in M3 is an etconcept, meaning that it refers only to banknotes and coins in circulation that are held outside the MFI sector (i.e.currency held by MFIs or “vaultcash”has been subtracted). Excluded are central banks'stocks of own banknotes (as they have not been put into circulation) and collector coins (as they are not intended for use in making payments).
