² Under the IMF's Balance of Payments Manual (6th Edition), the capital and financial account in the BOP structure is classified under the Assets/Liabilities principle.

Direct investments

Total FDI liabilities amounted to \$4.3 B.

The oil-gas sector accounts for 78.3% of FDIs.

Rise in net financial liabilities (**\$1 053.1 M**) on the oil-gas sector of the BoP's direct investments item stems from the difference between attracted investments (**\$4 275.2M**) and capital repatriation (**\$3 222.1M**)

Total amount of FDIs liabilities to the non-oil sector is estimated to equal \$930.1M

Box 1. The size, and structure of investments attracted to the Azerbaijani oil-and-gas sector, distribution of shares among investors with their further repatriation in the form of income and capital are being managed under international oil-and-gas contracts and recommendations of the IMF.

Repatriation of income under signed contracts is defined as the income a foreign investor earns from his/her investment. To note, under these contracts investors of relevant consortiums take back all of their investments to the Azerbaijani economy over the reported period in the form of extracted and exported crude oil (capital repatriation). In fact, this operation is the decrease in country's foreign liabilities in the financial account of the BoP ("-" net incurrence of liabilities).

Portfolio investments

Assets on portfolio investments increased by \$106.4M and liabilities decreased by \$495.0M. Assets on portfolio investments mainly increased due to the public sector, while liabilities decreased due to the public sector.

Loans and other investments

Net financial assets on loans increased by \$11.9 M, while net financial liabilities decreased by \$546.9M. Net financial liabilities on loans decreased at the expense of government guaranteed loans, bank loans, loans of the oil and gas sector, companies and other enterprises and increased at the expense of direct public loans.

Net financial assets on currency and deposits decreased by \$2.2B, while net financial liabilities increased by \$66.6M.

Reserve assets

Over the reported period country's reserve assets increased by \$5.1B.

Box 2. The Reserve Assets item stands for increase/decrease in country's foreign exchange reserves resulting from operations in current operations and financial accounts. In practice, in the event of current account deficit/surplus, the deficit/surplus should be financed/covered at the expense of the surplus/deficit of the capital and financial account. However, if the current deficit/surplus is not fully financed/covered at the expense of the surplus/deficit of the capital and financial account, then this gap may be financed/covered at the expense of reserve assets (foreign exchange reserves).

If total BoP deficit is not financed by reserve assets (or by contrast, the surplus is not reflected in the rise of reserve assets), the resulting gap is reflected as surplus in the 'Net errors and omissions'.
