* The change in the total number of payment cards is due to the reclassification of information on payment cards of statistical units.

** The decrease in the number of social cards is due to the expiration of agricultural cards.

*** The decrease in social cards is due to the withdrawal of agricultural cards.

7. Glossary

Gross domestic product (GDP)-is measured as aggregate of the added value, created in the branches of economics. The generalizing in economic indicator of the activities of producers-residents during the report period.

GDP deflator -the ratio of the gross domestic product at current prices to gross domestic product at constant prices multiplied by 100.It is the weighted average of the detailed price indices used to deflate the gross domestic product: the weights used reflect the importance of each category of output in the gross domestic product.

The Consumer price index (CPI) - is the main indicator of the inflation level. It characterizes the dynamics of the value of the goods and services obtained by the customer with a medium purchasing power. It reflects the changes of the total sum of the consumer expenses of the population on the unchanged able collection of the consumer goods and services within a definite period. The main purpose of CPI is to define the value dynamics of the consumer goods and services.

The Balance of payments (BOP) - the balance of payments is a statistical statement that summarizes transactions between residents and nonresidents during a period. It consists of the goods and services account, the primary income account, the secondary income account, the capital account, and the financial account.

Capital account- a BOP account that covers all capital transfers and acquisitions/disposals of non-produced, non-financial assets between residents and non-residents.

Current account- a BOP account that covers all transactions in goods and services, income and current transfers between residents and non-residents.

Income account- a BOP account that covers two types of transactions with non-residents, namely (!) those involving compensation of employees that is paid to non-resident workers (e.g., cross border, seasonal, and other short-term workers) and (ii) those involving investment income receipts and payments on external financial assets and liabilities, with the latter including receipts and payments on direct investment, portfolio investment and other investment, as well as receipts on reserve assets.

Trade balance- as sub-balance of a country's balance of payments showing the relationship between total exports and total imports. It is usually divided into a visible balance, referring to goods and an invisible balance, referring to services. The balance is in surplus if exports exceed imports; in deficit if imports are in excess of exports.

Currency in circulation- banknotes and coins in circulation, which commonly used to make payments. Currency in circulation as included in M3 is an etconcept, meaning that it refers only to banknotes and coins in circulation that are held outside the MFI sector (i.e.currency held by MFIs or “vaultcash”has been subtracted). Excluded are central banks'stocks of own banknotes (as they have not been put into circulation) and collector coins (as they are not intended for use in making payments).

Cash- the most liquid of assets, consisting of coin and banknotes; often defined as a zero-interest asset. Commercial banks also regard deposits at the'central'bank as cash.

The refinancing rate is the interes trate, formed bycredits, given by the Central Bank to Commercial Bank in the Form of refinancing. It issued by the Central Bank as the instrument of the monetary-credit regulation as them eans of influence on the percentage rate on interbank market, as well as on percentage rate on accounts and deposits of physical and juridical persons, and on the credits given to them.

The reserve requirements is a part of the attracted accounts deposits by commercial banks, kept in the proper order in the centralbank. It is one of the main instruments of monetary-credit policy. It reflects the mechanism of common liquid assets of the bank system.There server equirements are used for the prevention restriction of credit possibilities, credit organizations and the base less growth of the money supply in circulation.

The state short-termbills (ST-bills) are these curities issued by the Ministry of Finances with discount and for a definite circulation period on. The parameters of the ST-bills are defines by the Ministry of Finances. Placements of ST-bills held at the BakuStockExchange.

The volume of placement of ST-bills in auction is a part of the securities, obtained by the auction participants based on orders.

CBA's short- term notes are the non-documentary securities issued by the Central Bank with discount and for a circulation period to one year. It issued by the CBA as the instrument of the monetary-credit policy for regulation of money supply in circulation. Banks having CBA's license may be purchase short-term notes only.

Constant prices- a measure of an economic variable deflated to allow for price changes; for example, the national income at constant prices would show national income for a number of years at the prices of one year.

Core inflation rate- the underlying trend in inflation which depends solely on past labour and capital costs and firms' expectations of changes in these costs. This rate changes only if expectations based on extrapolating from past costs change. This rate is usually estimated by excluding volatile food and energy prices from the consumer price index.

Accrual interest rate- the rate at which interest accrues on a loan distinct from the rate at which it is actually paid. This accrual rate can be the current market rate or the original rate when the loan made.

Debt - the liabilities of a firm, a government or a household. A company's debt often takes the form of fixed interest debentures, cumulative non-voting preference shares and short-term bank loans. A government has bills as short-term debt and long-term debt issued as bonds. A household's debts include bank loans and liabilities incurred to purchase property and consumer durables.

Deficit (general government) – the general government's net borrowing, i.e. the difference between total government revenue and total government expenditure.

Foreign direct investment – 1. Investment in productive facilities by a foreign company, e.g. the purchase or building of factories; 2. The purchase of stocks and shares, which give a foreign company control over existing real assets.

Factoring – the sale at a discount of debts due to a firm. The factor purchasing these rights is entitled to collect the amount due. Factoring can be used to increase the short-term funds available to a business enterprise or to finance exporting.

Income – the flow of value, expressed in money or in goods and services, accruing to a government, a firm or an individual over a specified time period.

International reserves – a central bank's holdings of foreign currencies, gold and special drawing rights, which can be used in foreign exchange markets to change the value of a currency.

Letter of credit – a document issued by a bank to guarantee payment of sums due under bills of exchange and cheques. In most cases, these letters requested by importers to make them sufficiently credit worthy to be able to order goods from foreign exporters.

Maturity – the terminal date at which a bond, bill or debt is due to be paid.

Effective exchange rate – an index of a currency's international value in terms of a basket of currencies, weighted by the relative importance of each foreign country in the trade of the currency concerned.

Real exchange rate – a currency's value in terms of its real purchasing power. A basket of goods and services representative of an average consumer's purchasing is valued in the two currencies.
